

**BECOMIX – your partner for almost any kind of liquid and semi-solid productions**

BECOMIX is the leading international supplier of process systems for the development & production of liquid and semi-solid products in uncompromising quality. Our customers include companies from the pharmaceutical, cosmetics and chemical industries. The portfolio extends from laboratory mixers from 0.5 l to pilot systems from 60 l up to production systems for 20,000 l. Today, more than 2,000 BECOMIX systems in over 60 countries ensure unbeatably reliable mixing results. Each of them combines: Innovative mixing & homogenization technology, process engineering & plant construction as well as software for plant & factory automation.

BECOMIX offers a sophisticated modular product portfolio which enables our customers to implement even complex plants and the most demanding production procedures. The key to success lies in the combination of innovative technologies and premium products which can be used in a variety of ways and function industry wide, right from the start.
